

WEB DEVELOPER

Experienced web developer with over 2 years of expertise in React.js, AWS, and other web development tools. Proven track record in developing user-friendly websites and applications, dedicated to optimizing workflow processes and fostering innovation. Committed to ongoing professional development, with a strong ability to craft custom web elements and features that elevate user experience and deliver measurable results.

- Developed an AmazingAppVentures.com mobile application promotional site employing React.js, thereby playing a pivotal role in amplifying user interest and engagement that directly led to increased adoption rates for the mobile app, significantly benefiting the organization.
- Successfully created a dynamic website for KidsofCanada.com during tenure at TeamBonders Inc., resulting in a notable increase in user engagement, heightened registration efficiency, and more effective promotion of programs, consequently bolstering the company's online footprint.
- Diligently executed over 600 user acceptance tests for ICU web and mobile devices, ensuring strict compliance with functional requirements and effectively satisfying the needs of business clients.
- Spearheaded the generation of Entity-Relationship Diagrams for 30+ QuickBooks accounts spanning Skylight Health Group's five clinics that was instrumental in identifying and rectifying discrepancies in the accounts, ultimately enhancing financial transparency and operational efficiency with the organization.

GOGULAN RAVICHANDRAN

M: (647) 33/8-4197 ■ E: gogulanravi12@gmail.com
■ W: www.gogulancodes.com ■ Toronto, ON M1R 4T2

AWS Cloud Consultant

Apr/2021 – Apr/2022

ADASTRA CORPORATION / Toronto, ON

"For over 20 years, Adastra has been dedicated to delivering comprehensive solutions in Artificial Intelligence, Data Analytics, Cloud, Digital, & Governance solutions to its clients".

- Contributed to successful, on-time project completion by identifying and addressing potential issues before the software's release.
- Enhanced client satisfaction by delivering bug-free applications, demonstrating a commitment to high-quality solutions.
- Established a reputation for reliability and robust software solutions, earning the trust of clients and strengthening long-term relationships.

WEB DEVELOPMENT PROJECTS

Nov/2023 – Dec/2023 **Jobi – Job Search Platform** [[Live](#)] [[GitHub](#)]

- Modernized the job searching experience by creating a dynamic job search platform using React.js that empowered users to effortlessly search and apply to job listings from a multitude of companies through an intuitive interface that seamlessly integrated client-side routing with React Router for a fluid user experience.
- Pioneered the management of job posting data via Firebase Firestore, achieving efficient storage, addition, and deletion processes.

Dec/2022 – Jan/2023 **Dinner Party Menu Application** [[Live](#)] [[GitHub](#)]

- Developed a web application with advanced functionalities, enabling users to efficiently save dinner parties to a Firebase database as well as assign dietary restrictions to guests and seamlessly retrieve 20 recipes tailored to the group's dietary preferences from a RESTful API.
- Displayed proficiency in DOM manipulation, robust error handling, and intuitive UI design, highlighting strong skills in pair programming and effective communication through the project.

ADDITIONAL EXPERIENCE

100 Days of Coding Challenge | Feb/2023 [[GitHub](#)]

- Successfully executed 100 daily projects employing a wide range of front-end tools and languages, including modern technologies like React, Next.js, and Tailwind CSS. These projects significantly enhanced proficiency in HTML, CSS, JavaScript, and API integration. Additionally, developed robust time management skills to consistently meet daily project deadlines.
